**“Adolescence: The Trailblazing
Years – Understanding and
Appreciating Your Teen’s Brain”**

Ever wonder what’s going on in our teenagers’ brains? It turns out that there’s quite a lot! Learn about the normal changes that occur during the ages of 8-18, and how this affects decision making, impulse control, and getting ready to ‘leave the nest’. Find out what can influence the brain’s important developmental growth periods, and how we can help our students become their best selves.
